

Water Conservation

The FACTS:

A typical C-store requires approximately **500** gallons of water per pressure washing.

A quart of motor oil can contaminate up to **250,000** gallons of drinking water! – *DPW Bureau of Sanitation*

It is **illegal** to discharge contaminated wastewater into the sewer without meeting Federal, State and Locally mandated pretreatment standards. The contaminants end back up in our waterways.

eXIMO is a WATERLESS concrete cleaner that requires no water or power equipment.
