

Why Choose Tork® Products?

For every 100 cases of Tork 100% recycled paper products consumed, the positive impact on the environment will be

- Recycled Waste Paper – 2.1 tons
- Water Saved – 11,725 gallons
- Landfill Space Saved – 5.1 cubic yards
- Energy Saved – 6,767 kilowatts
- Carbon Dioxide Not Released – 7,105 pounds
- Air Pollutants Prevented – 201 pounds

So what does this really mean for the environment?

By recycling, this is what SCA saves annually!

-  800,000 tons of recycled paper = 800,000 bales of wastepaper, which can cover 249 football fields three feet high, including end zones.
-  13.6 million trees = filtering 653 million pounds of CO² and releasing enough O² into the air for 27.2 million people each year.
-  304 million gallons of oil = saving 137 million gallons of gas; 63 million gallons of diesel and home heating oil; 28 million gallons of jet fuel; 78 million gallons of other products such as kerosene and lubricants.
-  2.4 million cubic yards of landfill space = the amount of concrete that would build 33 Sears Towers.
-  3.2 billion kilowatts = the amount of energy it takes to power over 320,000 homes in California.
-  5.6 billion gallons of water = the amount of water in 56,000 Olympic size swimming pools.
-  3.4 billion pounds of carbon = equivalent of taking 168,000 cars off the road each year.
