

Vapor Systems Technologies, Inc. One Company – Integrated Solutions

Vapor Systems Technologies, Inc. began in 1989 with the vision of One Company – One Integrated Solution. Today, recognizing that a healthier environment is a need and not an option, VST has dedicated its undivided attention to the ever changing, stringent regulations that govern fugitive vapors at gasoline dispensing facilities (GDF). To this challenge, VST is committed to a continual R&D campaign of developing the most current technologically advanced solutions to service not only the United States , but the World. With 20 years of “Green” focused innovation, VST has earned an elite position in one of the most strictly regulated vapor recovery markets in the world – California. Thus, VST’s offering includes CARB EVR certified products. These innovative solutions include: the **ENVIRO-LOC™** vapor recovery product offering of Phase II vapor recovery hoses, safety breakaways, nozzles, and emission control systems for UST pressure management – including the latest innovation – the **Green Machine™**. VST markets through a distribution network both nationally and internationally.
